

Senior Microsoft .NET Developer

Job Description

SQL Sentry, Inc. seeks a Senior Microsoft .NET Developer for their product development team. The primary responsibilities include application development for database software products.

SQL Sentry software products enable database administrators to gain unprecedented visibility and control over their enterprise. At many of the world's largest corporations, DBAs find SQL Sentry products to be crucial for optimizing the performance of their servers as well as their DBA teams. SQL Sentry Inc. is headquartered in the suburbs of Charlotte, North Carolina. More information is available at www.sqlsentry.net.

Required Qualifications

- Strong customer service skills, extremely high attention to detail, aggressive troubleshooting, and strong decision-making skills
- Extensive knowledge of C# and the .NET framework.
- Firm understanding of OOP, including interface design, inheritance, and polymorphism.
- Extensive knowledge of WinForms.
- Experience designing and debugging multi-threaded applications in both Windows Service and WinForms environments.
- Experience designing secure applications and should be aware of security implications from design to implementation phase of project.
- Extensive SQL Server 2000 experience including database design and optimization. SQL Server 2005 knowledge is a plus.
- Extensive knowledge of ADO.NET and the SqlClient namespace.

Desired Qualifications

- Experience designing custom controls using System.Drawing/GDI+.
- Experience with ASP.NET, HTML, JavaScript and other Client-Side scripting technologies is a plus, as is knowledge of VB.NET, ASP / VBScript & IIS5/6.
- Knowledge of product development cycles and processes
- Project Management or Team Lead experience
- Experience with structured QA methodologies
- MCSD and/or other Microsoft certifications

Key Responsibilities

- Application development for the SQL Server tools business unit.
- Some client support, sales engineering and implementation services to support the SQL Server tools business unit.
